

DATA SHEET

# Caddy Electric Work Platforms

Safe

Easy

Ergonomic

*Traditionally workers would use large cumbersome ladders to perform duties at height, now the CADDY allows workers to produce twice as much, in absolute safety and maximum comfort.*

**A TIME SAVER**

The CADDY moves quickly and lifts / lowers the operator and goods to a desired height

**MAXIMUM EFFICIENCY - MINIMUM DIMENSIONS**

The CADDY can make a complete rotation on its axis due to its innovative drive system and easy to use control.

**ONE MAN ONE JOB**

Once the goods are placed onto the CADDY the operator does not have to go back down to move the ladder or move around on foot.

Max Working Height	5350mm	Max Gradeability	35%
Max Platform Height	3350mm	Raise/Lower Speed	18/14 sec
Height Lowered	1441mm	Tyres	Solid rubber non marking
Base Length	1560mm	Outside Turning Radius	1450mm
Width (Base)	808mm	Compartment Capacity	130kg
Entry Step Height	356mm	Hood Tray Capacity	113kg
Drive Speed Lowered	5.7km/h (95 mt/min)	Materials Tray Capacity	90kg
Drive Speed Raised	1km / h (14 mt/min)	Cycle / Drive	30km
